Digital Feedback Information Management System (DFIMS)

DFIMS is a web-application for "Feedback Management" that provides the facility to generate and manage feedback in a real-time and online environment. It is a web-based service, so nothing is to be installed and no servers are required. It offers many flexible and convenient features, allowing administration and staff to maximize time and efficiency by analyzing the detailed feedback reports auto-generated based on the feedback received.

Access Modules

Admin Panel: Manage Students Records, Staff Records, Classes, and Papers

Generate Customize Feedback Forms with user-definable Questions

Generate Filtered Feedback Reports

Student Panel: Submit personalized feedback based on the class and faculties assigned

Staff Panel: Anonymous feedback reports for the papers assigned

Key Benefits

- Real-time feedback dashboard
- Collect Instant Feedback
- Feedback is only visible to the authenticated user by privileges
- The system takes feedback on each subject and faculty
- Email Notifications
- Feedback analytics based on the average rating of all feedback

Salient Features
